St. Petersburg, FL

Dear Brett Emes:

Just a brief letter to thank you and your team at Solar Energy Management for a job well done in helping us improve the SunTrust building in St Petersburg with the addition of a 50KW solar power system. Your design and engineering team did a great job in engineering our foamed in solar power system. To date the Suniva solar panels and Fronius inverters have performed well.

Kudos to your group for your assistance in insuring the numbers made economic sense, and for securing the Progress SunSense monies.

We look forward to displaying the solar power production and carbon reduction data in our lobby. I would recommend your team at Solar Energy Management to other commercial clients.

Scott Gramling CEO
