Scott,

The purpose of this letter is to share with our Pasco friends the fantastic job you and SEM Power did designing, installing and integrating our solar power system.

You can see a video that shows our solar system on the roof by going to our web-site, FACTS-Eng.com. The video is on the home page.

We didn't get started until September of 2019. Even so, the system was mostly complete before January of 2020. The installation was done very cleanly with no impact on our production and other operations. Thank you for working during our off hours to eliminate any down time for us.

We had just put on a new roof prior to your installation of the solar panels. The fact that you were able to install the panels on the roof and meet hurricane wind requirements without having to penetrate the roof was a big plus for us. Your engineers also worked with our roof manufacture (GAF) to be sure their extended warranty was not impacted by the installation of the solar panels.

The system has been working flawlessly for nearly a year now and I greatly appreciate you checking our solar power production to be sure we don't have any issues.

The decision to install solar was easy. The solar panels have a 20-year warranty. The payments on the 15-year bank loan to finance the solar system was much less than our currently monthly electric bill. We believe the cost of electricity will go up in the future so what we did was essentially lock in a much lower monthly electric bill for at least the next 20 years.

Sincerely,

Ron McVety, President

Who is FACTS Engineering?

We are a manufacture of high value industrial control products sold by AutomationDirect.com. You might have heard of us because we have twice received a manufacture of the year award from PEDC in 2011 and 2017.

We won an award from GrowFL in 2012 as a Florida Company to Watch.

Our products have won numerous product of the year awards.
